## + ABOUT ME

Motivated and dependable full stack developer with comprehensive skills in multiple technologies. Proficient in both web and mobile app full stack development.

I am a fast and dedicated learner with a growth mindset, constantly looking to develop new skills and expand technical knowledge.

With many years of experience in working with clients and in a group environment, I put stress on responsibility, communication, and efficiency when collaborating with clients.

## + EDUCATION

- Touro College Los Angeles  
2015  
BACHELOR OF SCIENCE

## + LICENSES & CERTIFICATIONS

- REACT + REDUX, SOLOLEARN
- ANGULAR + NESTJS, SOLOLEARN

## + WORK EXPERIENCE

- Freelancing JAN 2022 - PRESENT  
SENIOR FULL STACK DEVELOPER

Worked as a software engineer at various companies such as Rock it, TwoN, Nextme, Brighthive, KnoCommerce, Package Portal, etc using React, React Native, Node, Laravel, Vue, Angular, etc.

Representative projects completed:

<https://apps.apple.com/us/app/rock-it/id1585666129>

You can use Rock It to market your events, create a community, and most importantly, make your events go viral. The first round of app development is now over. I worked as a senior React Native developer with two React Native developers and one backend developer.

<https://www.finmason.com/>

FinMason is the world's largest independent investment analytics engine for financial services platforms. I worked as a senior React frontend developer on this project with the developers of Two-N company.

<https://knocommerce.com/>

KnoCommerce gives you the survey tools you need to gain insight that drives better ROI(Return on investment). I worked as a Node/Vue full stack developer on this project alongside CEO Jeremiah Prummer.

- Innosol Inc FEB 2019 - NOV 2021  
Full-time  
SENIOR REACT/LARAVEL DEVELOPER

- Took a leading role in developing the front end of a highly engaging responsive D3.js visualization platform built in React/Redux environment that intended to provide analysis tools of equity market activities for institutional users.
- Identified efficient solutions to optimize React site performance, including using Canvas, lazy loading, etc., which dramatically boost performance (>10x) in visualization of large data elements(100k) with tons of interactions.
- Developed and maintained a multilingual educational site, a travel site for international students and the company site. (Techniques used: Laravel, HTML, CSS, JQuery, JavaScript)
- Improved the sites' performance by caching content, image compression, combining and minifying CSS and JS files, etc.

- VYNYL JUN 2016 - NOV 2018  
Full-time  
REACT NATIVE DEVELOPER

- Developed Custom WYSIWYG drag & drop charting solution that lead to the company signing deals in the millions of US dollars.
- Built custom mobile apps that interacted with Vehicles over BLE.
- Implemented a Monorepo for React & React Native.
- I lead projects from start to finish and Hired multiple engineers to help complete projects.
- Designed a Timeseries system for large data ingestion.
- Implemented React & React Native Components to speed up development.
- Built a music player with custom native modules for file system scanning.
